---

However, undocumented communication devices have reportedly been found in some Chinese solar power inverters. And over the past nine months, such devices--including cellular radios--have also...

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters connected ...

U.S. energy officials have intensified scrutiny of Chinese-manufactured components in renewable energy infrastructure after the identification of undocumented communication devices ...

For months, experts examining renewable energy equipment imported from China have been quietly finding rogue components in solar inverters and large batteries, two people familiar with ...

U.S. energy officials are reportedly reassessing the security risks posed by Chinese-made components in renewable energy infrastructure after discovering hidden communication ...

Recent investigative reports have uncovered concerns in the renewable energy sector: rogue communication devices found embedded within solar power inverters and batteries, many of ...

Over the past nine months, U.S. experts have identified these undocumented devices in solar power inverters and batteries from multiple Chinese suppliers during detailed security ...

LONDON, May 14 (Reuters) - U.S. energy officials are reassessing the risk posed by Chinese-made devices that play a critical role in renewable energy infrastructure after unexplained...

Every solar panel and battery connected to the U.S. energy grid relies on a device few people ever consider:

the power inverter. In May of 2025, U.S. experts found undocumented ...

This investigative article exposes the discovery of undocumented communication devices hidden in Chinese-made solar inverters, creating unprecedented vulnerabilities in global power grids.
