

# Comparison between Off-Grid Energy Storage Cabinets and UPS Power Supplies

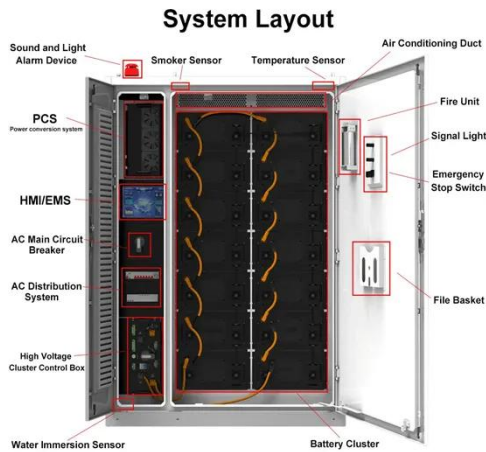

## Overview

---

Uninterruptible Power Supply (UPS) and Battery Energy Storage System (BESS) are both used to provide backup power, but they serve different purposes and are used in different contexts. Think of it as your safety net—the thing that kicks in immediately when everything else goes dark. UPS systems usually come with batteries that offer backup power for a few. Enter energy storage cabinets and UPS systems, two technologies often confused but fundamentally different in operation. Here's a breakdown of the key distinctions: 1. This is especially true for critical applications such as industrial plants, offices, healthcare facilities, utilities, and data.
