

Electric vehicle infrastructure berlin

Overview

There is a growing sharing sector for cars, e-bikes, scooters, and e-scooters. In 2018, the Berlin Mobility Act came into force with the primary objective to increase road traffic safety ('vision zero') and promote eco-mobility through public transport, cycling and walking. In 2024, almost 5,800 new electric vehicles were registered in Berlin, according to reports from the Federal Motor Transport Authority. Understanding the. The Berliner Verkehrsbetriebe (BVG) is Germany's largest public transport company, which operates the bus, tram, metro, and ferry networks in Berlin. As a key actor in the city's sustainable mobility transition, BVG plays a central role in achieving the State of Berlin's target of climate. The number of charging points for electric vehicles in Berlin must increase significantly in the coming years.

Electric vehicle infrastructure berlin
