

Homemade heating with photovoltaic panels

Overview

In this video, I experiment with how to build a simple, DIY-friendly solar heater that provides REAL heat for your home, garage, or workshop. This is the ultimate winter DIY project. Forget complex systems—this design is easy to build, uses common materials, and the results are. Stop dreading that winter heating bill. Draw the energy from the sun to produce heat so you can continue to work in your garage or out building all winter without increasing the cost of your monthly utilities. A solar air heater is also. If you're looking for a cost-effective and eco-friendly way to heat your home, look no further than a solar-powered heater. As an expert in the field of sustainable energy, I believe that everyone should have access to affordable and eco-friendly heating options.
