

# How much does it cost to generate 10 kilowatts of solar power at home

## Overview

---

On average, a 10 kW solar panel system costs \$25,400, according to real-world quotes on the EnergySage Marketplace from 2025 data. But your actual price will depend on factors like your roof's. Most homeowners spend between \$12,600 and \$33,376 to install a complete residential solar system in 2026, with the national average at \$19,873 before incentives. That is about 1,000 to 1,500 kWh per month, or about 12,000 to 18,000 kWh per year. Here's what affects the production: Location: In sunny states like Arizona or California, your system will produce more power. So, a 10kW solar arrangement that produces 40kWh of electricity will just about be enough for them. Subsequently, their electricity consumption will impact the overall savings on their solar array investment.
