

# Lithium battery distribution box energy storage system

## Overview

---

Containerized Battery Energy Storage Systems (BESS) are essentially large batteries housed within storage containers. These systems are designed to store energy from renewable sources or the grid and release it when required, discharging the electricity to its end consumer. The 2024 ATB. While lithium-ion dominates today, new technologies are reshaping distribution room needs: With 12 years in renewable energy systems, EK SOLAR has deployed battery distribution solutions across 23 countries. In this article, we explore how utilities and developers are approaching the planning, deployment, and integration of grid-level storage.
