

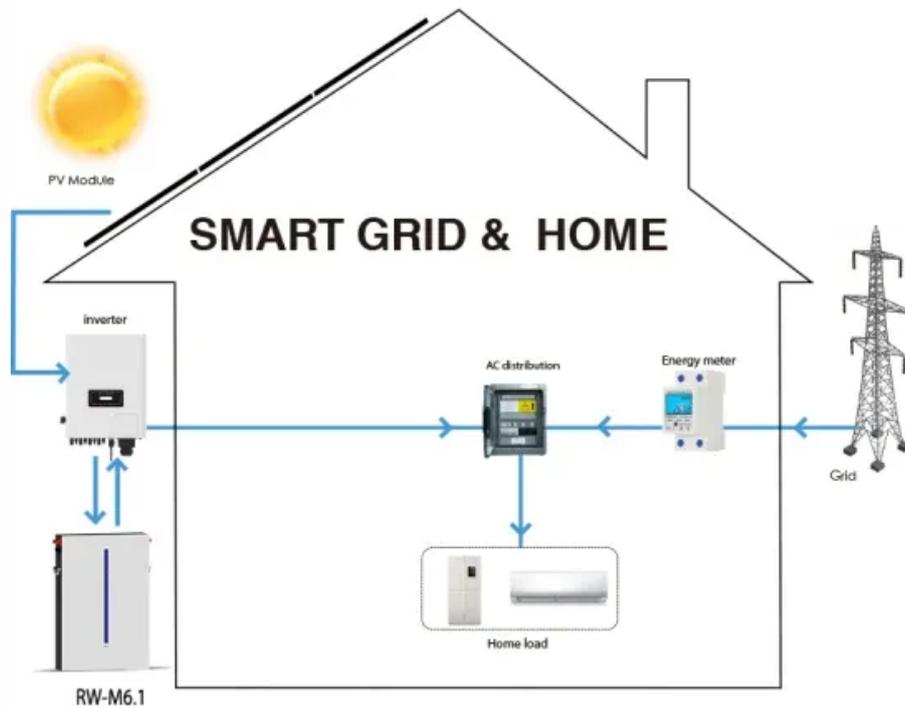

Photovoltaic panel support construction period calculation

Overview

Most homeowners save around \$60,000 over 25 years. Calculating your solar payback period is straightforward: Divide the cost of installing your system by the amount of money you'll save each year. $\text{Total system cost} \div \text{annual savings} = \text{solar payback period}$. Regional Payback Variations Are Extreme: Solar break-even periods range from just 2.4 years in Hawaii to nearly 20 years in Utah, primarily driven by local electricity rates and state incentives.
