

What to do if solar panels don't generate electricity

Overview

If your solar panels aren't generating energy, it's crucial to diagnose and fix the problem as quickly as possible. Whether you're searching. One of the most common complaints we hear from homeowners is that their electricity bills are still high because their new solar panels are not producing enough power. Check your inverter's indicator lights first – a green light means normal operation, while red or orange signals a potential issue requiring attention.

What to do if solar panels don't generate electricity
