Overview

China, Vietnam, Malaysia, and India manufacture 89% of the world's solar panels between them – and Asia's contribution to the industry doesn't stop there. Manufacturing Renaissance Driven by Policy Support: American solar manufacturing has reached a critical milestone in 2025, with domestic factories now capable of producing enough panels to meet nearly all U. South Korea, Thailand, Taiwan are also among the nine largest producers of solar panels. There are no European countries in the top nine largest. The surge in demand has driven a dynamic manufacturing landscape, with Asian firms dominating global shipments and the United States building its own supply chain.
