It is expected to reach a shipping capacity of 3GW by Q3 2025, positioning ES Foundry as a cornerstone of the domestic solar supply chain.

Iraq signed a renewable energy agreement in 2025 with a US-UK company to develop a large-scale solar power project, according to the energy platform Taqa.

With a massive installed capacity of 3 gigawatts (GW) and over 5.9 million solar panels, the plant will generate around 5.7 billion kilowatt-hours of electricity annually - enough to...

The gigafactory will produce 3GW of clean energy capacity by 2024, becoming Europe's biggest solar panel production facility. Following the initial commitment by UniCredit, later flanked by ...

TOPCon cells have been hailed as one of the most significant innovations in solar panel technology in the last decade. The new cells can achieve efficiencies of up to 24.1% and offer ...

A gigafactory that will be able to produce up to 3GW of photovoltaic panels a year by 2024, helping to meet European energy transition objectives and reduce fossil fuel reliance across ...

According to the company, this project will become the largest solar manufacturing plant in Madhya Pradesh. The first phase will include a 3GW solar cell production line and a 4GW module ...

Cumulative installed solar capacity, measured in gigawatts (GW).

Solar energy in the United States is booming. Along with our partners at Wood Mackenzie Power & Renewables, SEIA tracks trends and trajectories in the solar industry that demonstrate the diverse ...
