Our mid-node 500 kW/250 kWh Battery Energy Storage Systems (BESS) are designed to satisfy a variety of on and off-grid applications, enabling reduced emissions and costs.

The 250KW/500KWH commercial energy storage inverters adopt advanced digital control technology and are equipped with the independently developed microgrid management system, which optimizes ...

Off grid standby power supply: when the power supply of the power grid is interrupted, provide uninterrupted short-term power supply for important loads to reduce the economic losses caused by ...

We have been specializing in ICESS (Industrial and Commercial Energy Storage System) solutions for over 9 years. We currently have 87 employees, including 24 engineers.

Customizable 500KWH 1MKH Solar Lithium Ion Battery Storage Container for Off-Grid Solar Energy System

Building fully integrated regional grids, long-distance transmission lines and grid-scale storage technologies is imperative for Southeast Asia so that countries can start capitalising on their ...

Four original case studies of solar power inverter systems with lithium batteries deployed in Southeast Asia--design choices, performance insights, and how storage cuts diesel and grid costs.

Namkoo's containerized battery energy storage solution is a complete, self-contained battery solution for utility-scale energy storage. It puts batteries, A/C, UPS, inverter and auxiliary equipment in a single ...

We have seen an immediate reduction in our energy bills and a change in our power consumption patterns since we installed the PVMARS off-grid solar power system.

500kWh Off-Grid Solar Energy Storage Unit from East Asia for Airport Use

The energy storage system has perfect functions of communication, monitoring, management, control, early warning and protection. It operates continuously and safely for a long time.
