-----

In summary, choosing the right server rack for your data center involves understanding the various types, dimensions, and features that make up these essential components.

The most advanced UPS in its power range, the Eaton 93PR is ideal for small to mid-sized data centres and other mission critical applications where efficiency, reliability, safety and scalability are essential.

Enhance Performance with Advanced Rack Cooling  
High-Capacity Cooling For High-Density Data Centers  
Cooling Efficiency For Air and Liquid-Cooled Servers  
The ChilledDoor™ system fits any industry-standard server rack, including Open19 and OCP setups, enhancing your data center's cooling strategy with seamless integration into your existing infrastructure.
