Li-ion based LFP batteries with corresponding Battery Management System (BMS) combined with an independent selection of established component suppliers. Guaranteed lifetime with a minimum of 10 ...

Alfen's modular TheBattery products allow for fast, cost-effective installation, tailored to any power-to-capacity ratio. Our innovative products incorporate industry leading safety design and control ...

Each battery cabinet features high-quality LFP cells and smart systems like deflagration venting, fire suppression (water/aerosol), and an advanced battery management system, ensuring superior safety.

Danfoss equipment converts energy shaving for incoming power, time shift from the battery to grid and vice versa, for production, and back-up to avoid seamlessly cooperating with a grid outage situations.

Fully integrated end-to-end storage solution Turnkey realization of complete battery projects including project management, substations, grid connection, remote monitoring and on-site service.

Located in Waddinxveen, Netherlands, the project will help reduce grid congestion and ensure a more stable electricity supply for local communities and businesses.

With solar and wind contributing 22% of EU's electricity in 2023, energy storage systems must balance intermittent supply. Dutch innovator Alfen delivers modular battery solutions that adapt to residential, ...

Alfen's energy storage solutions are underpinned by two key products: TheBattery Elements and TheBattery Mobile. Read more about Alfen's energy storage solutions.

Alfen, an energy solutions specialist in Europe, is to build one of the first large scale 4-hour battery energy storage systems in the Netherlands. The company has signed an agreement ...

TheBattery comes as a Plug & Play standardized unit, manufactured, preconfigured, commissioned and tested

Alfen battery

in Alfen's production facilities. This guarantees minimal on-site impact and instant operation.
