What is arc resistant switchgear?

Unlike conventional switchgear, arc-resistant switchgear is designed with reinforced compartments that can withstand incredible pressure increases during high-energy arc faults. Arc-resistant switchgear offers a safe, proven, and cost-effective solution to the problem of arc flash events. Why do I need Arc-Resistant Switchgear?

What is arc-resistant switchgear?

Because arc-resistant switchgear is specifically designed to contain and limit the damage incurred from internal arc faults, it provides the highest degree of protection to personnel, long-term savings, and a significant reduction in downtime.

Does Eaton offer arc flash protection?

Eaton offers electrical consultants, electricians and power system engineers a variety of tools to help design the correct solution according to IEC standards. Arc flash risk is greatest during maintenance operations. Eaton's new NZM digital circuit breakers can be equipped with Eaton's Arcflash Reduction Maintenance System (ARMS).

What is Eaton Arcflash reduction maintenance system (arms)?

Eaton's new NZM digital circuit breakers can be equipped with Eaton's Arcflash Reduction Maintenance System (ARMS). ARMS' near-instantaneous reaction time greatly reduces arc flash energy and risk to personnel. Arc flashes can occur in electrical distribution systems, regardless of preliminary protective measures.
