The projected increase comes as the Australian Energy Market Operator (AEMO) on Monday (29 October) revealed that over 45GW of solar PV, wind and energy storage projects are ...

In 2025, Australia's rooftop solar capacity reached 28.3 GW, surpassing coal power, while home battery installations quadrupled, driven by new government programs and a market shift ...

AEMO said the Draft 2026 Integrated System Plan (ISP), open now for consultation ahead of the final 2026 ISP being released in June next year, presents a roadmap for generation, ...

Global clean energy major EDP Renewables plans to accelerate the development of more than 1.7 GW of solar and battery storage in Australia after securing support under the federal ...

Discover the latest solar news in Australia for 2026, including rooftop solar growth, battery storage trends, and major energy policy updates.

As Australia's national science agency, CSIRO has turned its decades of expertise in energy to answer this challenge through this Renewable Energy Storage Roadmap. We delivered our first net zero ...

Australia's energy needs will be transitioned to renewable energy in the form of wind, solar and battery storage. Storage is set to increase dramatically from around 3GW currently, to ...

This is the third edition of the Clean Energy Council's (CEC) half-yearly report monitoring the progress of the deployment of rooftop solar and behind-the-meter energy storage systems in Australia.

Australia's solar and energy storage sectors delivered strong performance during the third quarter of 2025, with grid-scale solar generation reaching 1,699MW average output while battery...

Australia's energy market hit a turning point in 2025. As rooftop solar growth slowed, battery installations

Australia s PV Energy Storage Plan

surged to record levels, reshaping how homes and the grid use electricity. This blog ...
