Our project "Underground Sun Storage" was presented as one of the projects for future in the Austrian pavilion. With innovative green gas solutions such as "methane electrolysis", we want to make a ...

With "Underground Sun Storage", the world's first hydrogen storage facility in an underground porous reservoir, RAG Austria AG - Renewables and Gas - and its project partners are ...

This event will bring together key stakeholders from across the region to explore the latest trends in energy storage, with a focus on the increasing integration of energy storage into regional ...

Gas storage operator RAG Austria AG has received a Project of Common Interest (PCI) status for the first phase of a major cross-border hydrogen initiative involving the establishment of a ...

RAG Austria has already put the solution into practice: The international flagship project Underground Sun Storage has demonstrated that green hydrogen can be stored safely, efficiently, and seasonally ...

Together with a selected group of international partners RAG Austria will demonstrate complete, competitive and qualified large-scale hydrogen storage in a porous subsurface reservoir to enable ...

As part of the Horizon Europe Framework Programme (HORIZON) call for proposals to investigate and scale up the large-scale underground storage of hydrogen, the EUH2STARS project, ...

Expansion of gas storage in Upper Austria and Salzburg over the past 20 years has made these facilities a cornerstone of security of supply in Austria and Central Europe.

In 2023, the world's first hydrogen storage facility was opened in an underground sandstone gas reservoir as part of the flagship project Underground Sun Storage 2030 (USS 2030) ...

Slovenian company NGEN has switched on what it claims to be Austria's largest battery storage facility. The

Austria s 100MW energy storage project

project is located next a wood gas generator which opened in November 2024 in ...
