The automatic adhesive tape between the cell strings is realized. When the number of adhesive tapes is pasted, the speed fast, replacing the manual labor greatly and improves the working efficiency, and ...

The ECOTAPE A is a fully automatic inline edge taping machine designed specifically for solar panels. It automates the application of tape along the edges, effectively replacing the traditional silicone ...

Our solution is free from lead and requires 60% less silver producing a PV module. By avoiding high temperature soldering we lower the risk of cracking the cells.

Automatic taping machine is used for pasting PV module tapes. The machine adopts Servo control, servo motor drive tape sticking mechanism, high speed, high precision. Rolling the tapes with rollers ...

This station automates the application of adhesive tape between cell strings. It operates at high speed, significantly reducing manual labor and enhancing work efficiency. The adhesive is applied ...

Horad New Energy is a reputable manufacturer and supplier based in China, offering a wide range of Automatic Edge Taping Machine products. With our advanced production facilities and stringent ...

This station automates the application of adhesive tape between ...

An automatic edge taping machine is used for automatic tape edge banding of dual-glass solar modules, adapting to different specifications of tapes. The edge bander can replace tapes quickly and easily ...

In operation, the tape sticking machine receives the components ...

tesa ® ACX plus is recognized for its versatility and reliability in various high-performance bonding scenarios. It is used in the photovoltaic solar tape application solution, where it provides robust ...

Automatic foam sticking machine for photovoltaic panels

Explore the critical role of solar taping and trimming machines in PV module production. Learn how this equipment works and how to choose the right model.

In operation, the tape sticking machine receives the components welded from the auto bussing machine, and automatically sticks transparent tape between the cell strings on the component to fix the string ...
