These high performance products for blade bonding as well as injection and repair have excellent strength and crack resistance, ideal rheology, and are fast curing yet offer a long open time.

A technology for wind turbine blades and glue storage, which is applied in the fields of final product manufacturing, climate sustainability, coating, etc., and can solve problems such as early ...

Our state-of-the-art glue dispensing machines are engineered to fulfill the stringent standards of the alternative energy sector, resulting in efficient, dependable, and high-quality manufacturing of solar panels, wind ...

Scientists at Fraunhofer IWES have therefore combined the experiences they have gained during a decade of research into rotor blade manufacture and developed a solution which simplifies and improves ...

They offer easy cleanup, rapid curing over a wide temperature range and superior strength and resistance. All these benefits make Plexus two-part adhesives the ideal method for repairing and retrofitting wind blades, ...

Discover Twin's precision machines for mixing two-part structural PU and epoxy adhesives in wind turbine blade bonding. Ensure 100% accuracy, reduce waste, and scale production for blades up to 85 meters with ...

Wind turbine blades are generally made of two shells that are bonded together with a structural adhesive. K.P. Subrahmanian and Fabrice Dubouloz of Huntsman Advanced Materials discuss the requirements for the ...

The gluemix is a compact gear pump driven metering and mixing system, which has been specially developed for the production of rotor blades in the wind industry. It is used to handle medium to high viscosity multi ...

These advanced glue dispensing machines provide precision, efficiency, and versatility, customized to meet the needs of many different applications. Our collection ranges from fully automated glue dispensing systems to ...

Automatic glue injection machine for wind turbine generator
