The national energy strategy (2023 draft) envisages that by 2050 Bulgaria will have 11.8 GW of PV, 5 GW of onshore wind, 3.3 GW of offshore wind, and 2.3 GW of energy storage capacities in operation.

The latest white paper, prepared by Fluence in collaboration with APSTE, examines the current state of the Bulgarian energy market and the potential for energy storage applications to revolutionise the ...

Bulgaria's energy generation includes nuclear energy, solid fuels, such as lignite, as well as small quantities of gas. The role of renewable energy sources (wind, solar, biomass, and hydro) ...

The increased interest in the renewables sector has also been fuelled by the launch of the first auction procedures in Bulgaria to support renewable projects co-located with storage ...

capacity to 2.2 GW with another 700 MW expected to become operational in 2023. In other words, Bulgaria could easily sail past its 2030 National Ener.

Developers of 249 projects in Bulgaria will receive EUR 268 million in total grants for renewable electricity plants with energy storage.

Wind power generated 2% of electricity in Bulgaria in 2023. By the end of 2020 almost 1 GW of onshore wind power had been installed. It has been estimated that there is potential for at least another 2 GW by 2030. The total wind power grid-connected capacity in Bulgaria was 702 MW as of 2023. An energy island in the Black Sea has been suggested for joint development with wind power in Romania.

At the same time, solar and wind capacity are accelerating, with Bulgaria expected to add several gigawatts of new renewable projects by 2030.

This investment aims to expand the country's energy infrastructure and support the growing share of intermittent renewable power, particularly from solar and wind.

List of wind farms in Bulgaria This is a list of wind farms in Bulgaria as of the end of 2015.

Bulgaria is also making strides in other renewable energy sources (RES), including wind, hydro, and bioenergy, while nuclear energy remains a significant part of the mix.
