Question: For solar cars where the driver's head rises above the top of the solar car body, does the additional roll bar require the same minimum dimensions as the primary roll bar? Answer: The ...

A great deal of lateral thinking is required to meet conflicting needs of maximising the solar collection area, minimising aerodynamic drag and other design regulations needed to qualify for the Toyota ...

Well, the World Solar Challenge 2025 Regulations are out. In the Challenger Class (above), changes include: In the Cruiser Class (below), changes were greatly needed, and I think the ...

It determines the world's fastest solar car in a speed race! Vehicles in this class are required to achieve the highest energy efficiency. The winner is the team that reaches the finish line in Adelaide the ...

For the second race in a row, the ETH Zurich aCentauri team uses a PowiGaN-based DC-DC converter provided by Power Integrations to power all the 12 V electronic systems in their ...

These panels are adept at converting more sunlight into usable energy, even under less-than-ideal conditions, making them perfect for the unpredictable environments of endurance racing.

Bridgestone World Solar Challenge 2025 - the world's greatest innovation and engineering challenge driving decarbonisation through sustainable mobility.

The World Solar Challenge (WSC), named the Bridgestone World Solar Challenge since 2013, is an international event for solar powered cars. The course is over 3,022 Kilometers (1,878 miles) through the Australian outback, from Darwin in the Northern Territory to Adelaide in South Australia. The event was created in 1987 to encourage the development of solar-powered vehicles and has been held fifteen times over its 32-ye...

At Phoenix Racing Team, we are committed to building the most innovative and eco-friendly solar-powered

Challenger Cup Photovoltaic Panel

race cars in the world. Our team is made up of experts in the fields of engineering, design, ...

The World Solar Challenge is usually held every two years, but the 2021 event [3] was canceled because of the COVID-19 pandemic, causing a four-year gap between the 2019 and 2023 events. ...

Our flagship events--the American Solar Challenge and Formula Sun Grand Prix--push collegiate teams to design, build, and showcase the capabilities of their solar-powered vehicles ...
