China will negotiate and sign a new economic pact with Africa that will get rid of all tariffs on the 53 African states it has diplomatic ties with, it said, a move that could benefit...

China announces a comprehensive tariff-free trade pact with 53 African countries, eliminating import duties and opening massive market opportunities. The deal strategically positions ...

China says it will sign a new economic pact with Africa that will get rid of all tariffs on the 53 African states it has diplomatic ties with - a move that could benefit middle-income...

China's zero-tariff policy for African goods has expanded rapidly in recent years, with 53 of the continent's countries now eligible to export their taxable goods to the Chinese market duty-free.

It's part of a wider energy shortfall that has left more than 500mn African people still without electricity. Yet there are signs that the picture is starting to improve at an accelerating pace.

Read the full chapter on rebooting global partnerships. While the zero-tariff policy appears in favor of increasing African exports to China, the story is not as straightforward.

China has recently announced a significant expansion of market access for 53 African nations, eliminating tariffs on all imports. This sweeping move, excluding only eSwatini due to its ...

With 53 African countries now eligible to export goods duty-free to China, Beijing's expanded zero-tariff policy is being heralded as a milestone in South-South cooperation.

Despite the announcement of China's zero-tariff policy for 53 African countries, the move must be understood within the broader context of China's strategic objectives.

Two major areas of international trade that will remain causes of concern for energy storage projects are the application of tariffs and supply chain integrity.
