All Cytamobile-Vodafone subscribers, individuals and companies have access to the 5G network at no extra charge. All a subscriber needs is to be to have a 5G device certified on the Cyta ...

Today, the 5G network in Cyprus stretches far beyond the capital. Coverage includes coastal towns, mountainous areas, and even traditionally underserved rural regions.

The company quickly upgraded its infrastructure and currently offers 5G access to most customers with compatible devices, especially in Nicosia, Limassol, Larnaca, and Paphos.

Compared to the previously implemented 4G, 5G technology offers faster speeds, lower latency, and better connectivity among users. The improvements have a substantial impact on how ...

For the micro base station, all-Pad power supply mode is used, featuring full high efficiency, full self-cooling and smooth upgrade for rapid deployment and site construction & operation costs reduction.

Cyta has announced the completion of the pan-Cypriot 5G mobile network that offers state-of-the-art telecommunications services throughout the country, even in its most remote areas.

In accordance with the signed contract, 5G is planned to be put into service Complete Guide to 5G Base Station Construction | Key Steps, Explore how 5G base stations are built--from site planning and ...

Cyprus is the 1st European country to reach 100% 5G population coverage in outdoor areas. 5G is much more reliable than its predecessor and that translates into a better quality of service.

The telecoms regulatory body Cyta bragged that Cyprus was the first EU country to announce complete 5G population coverage, including in isolated mountainous locations.
