What Is Coupling? AC vs DC Signals How Do I Know If I Want An AC Or A DC Signal? Isn't An LFO An AC Signal? Don't We Sometimes Want DC in Audio? Bottom Line What Do You Do If You're Not Sure What Types of Signals A Module Is Expecting? Generally, unless you are intentionally using audio-rate modulation for things like FM synthesis, assume your modulation sources are DC signals. Pitch sequences, CV sequences, envelopes and even LFOs will all get filed under DC. AC signals will be anything in our audio path. See more on [noise engineering](#) [Renogy AC Coupling Vs.
