The U.S. Large-Scale Solar Photovoltaic Database provides the locations and array boundaries of U.S. photovoltaic facilities, with capacity of 1 megawatt or more.

There are several options for filing solar energy projects at the Department of Buildings. Projects may be filed as part of another New Building or Alteration permit application.

The energy output of a solar energy system is optimized by designing the array to be tilted on an incline that approximately matches the degrees of the geographic latitude of the array's location; significant ...

The New York Solar Guidebook has information, tools, and step-by-step instructions to support local governments managing solar energy development in their communities. The Guidebook contains ...

The U.S. Solar Photovoltaic Database (USPVDB) provides the locations and array boundaries of U.S. front-of-the-meter, photovoltaic facilities, direct current capacity of 1 megawatt or more, that became ...

NY SOLAR MAP estimates rooftop and ground mount solar electric potential (PV panels) and connects you to local solar resources.

This drawing can also show compliance with the zoning height/setback requirements and can indicate the location of the mounting systems, panels, and the structural members of the roof.

A solar PV module or "solar panel" is an electrical generation device that produces DC current when exposed to sunlight. Most modules consist of 60-72 small, conjoined solar cells, an aluminum frame, ...

The U.S. Department of Energy (DOE) Solar Energy Technologies Office (SETO) conducts research to reduce the cost and impact of siting solar. We've answered some common questions about large ...
