The SEISMIC-Racks are applied in all fields in which earthquake-proof battery deployment is required.

The frame of the SEISMIC cabinets is welded. The battery is held in troughs. The welded back wall creates a very stable cabinet system that keeps your battery safe during any earthquake and can ...

Keep equipment safe in the harshest of environments. Eaton Seismic Cabinets are designed to protect rack-mounted equipment in earthquake prone settings.

Empower your off-grid projects and grid-support applications with a reliable outdoor battery storage cabinet from TOPBAND. Engineered for harsh climates and demanding workloads, ...

How much structural stress can modern energy storage cabinets endure during seismic events? As global deployments surge 78% year-over-year (Wood Mackenzie Q2 2023), earthquake resilience ...

Our seismic battery racks are either certified, or built to, Seismic Zone 4 IBC/UBC standards. These earthquake-proof racks for static battery installations are approved for use in California, in ...

Seismic battery racks are specialized structures designed to secure batteries during earthquakes. They prevent displacement, damage, or electrical hazards by anchoring batteries to floors or walls.

EnviroGuard's Rack Series seismic flooded battery racks conform to UBC standards and are certified to meet IBC 2012 standards for essential facility applications.

The SEISMIC rack is specially tailored to your battery and therefore space-optimized.

The cladded rack systems are customised to fit all types of stationary battery. Either standard or customised designs, these racks have the option to include modular cladded panels.
