Our solar-powered refrigerated containers are carefully packaged and shipped to ensure safe delivery. Available in 20ft and 40ft sizes, these units are designed for efficient cold storage and easy transportation.

Solar-powered shipping containers are ideal here. They provide energy for irrigation in remote Kenyan farms or refrigeration in Chilean vineyards without grid access.

This study explores the design and adaptation of a shipping container into a portable irrigation control station for agricultural operations. The project leverages the structural durability...

This article examines the role of solar containers in earthquake response, their deployment benefits, and field deployments of how they provide clean and reliable power when it's needed.

Solarators(TM)--sustainable, off-grid refrigeration powered entirely by the sun. Designed for high-performance, temperature-controlled cold storage, Solarators® operate as efficiently as industrial freezers and ...

Our 20 and 40 foot shipping containers are outfitted with roof mounted solar power on the outside, and on the inside, a rugged inverter with power ready battery bank.

Designed to be self-sustaining, Aquatree Ecosystem can come equipped to run on solar power, use minimal water, and be deployed anywhere disaster strikes.

We design a solar container that fits your needs and send you a personalized quote.

Insula's modular, solar-powered containers support irrigation, cold storage, and equipment charging--built for

Earthquake-resistant solar-powered containers for agricultural irrigation in Hargesa

efficiency and sustainability.

Container farming is a vertical farming system that uses modified shipping containers for growing food inside without the need for power, water, sunlight or nutrients.
