When will South Africa see electric vehicles?

Patel said South Africa could see the first electric vehicles as early as by 2026. Last week, Cabinet approved the White Paper on EVs to ensure that South Africa becomes part of the global shift from internal combustion engines to new technology vehicles.

How can South Africa lead in EV policy implementation?

Strengthen partnerships between government, industry, and municipalities to create a cohesive framework for EV policy implementation. The EV White Paper represents a pivotal opportunity for South Africa to lead in sustainable transport and achieve its climate goals.

Can South Africa develop a roadmap to electric vehicles?

In August 2019, the Minister of Trade, Industry and Competition set the large auto-makers in South Africa a challenge: to help develop a roadmap to the local production of electric vehicles.

What does the EV White Paper mean for South Africa?

The EV White Paper, a key policy document, outlines South Africa's vision for transitioning to electric mobility. However, achieving its ambitious objectives requires targeted actions to address policy gaps and implementation challenges.
