---

The EU, UK, Norway, and Switzerland together are expected to reach 100 GW of installed energy storage later this month, according to new analysis launched on Wednesday by LCP Delta and ...

In March 2025, the Commission launched the European Energy Storage Inventory, a real-time dashboard that displays energy storage levels across different European countries. It is the first European ...

This tracker monitors the Horizon Europe's financial contribution to the clean air policy (National Emission Ceiling Directive) aiming to improve ambient air quality and tackle air pollution, to protect the ...

It's not just about cutting emissions - it's about building a stronger, more competitive and resilient Europe that leads in sustainable transport. This ambitious plan shows the Commission's firm commitment to ...

Welcome to Europe's new energy storage line initiative - the aviation industry's ambitious bet to slash emissions. In 2023 alone, European airlines burned through 60 million tonnes of jet fuel.

The EU-funded PUSH-CCC project aims to tackle key challenges of compressed air energy storage (CAES) technology by enhancing its scalability, efficiency, energy density and commercial viability ...

Compressed Air Energy Storage (CAES) offers potential, but faces challenges including poor efficiency and reliance on fossil fuels. In this context, the EU-funded Air4NRG project aims to improve long ...

As European airports morph into giant power banks and cargo holds transform into flying storage units, one thing's clear: The future of air transport isn't just about moving people - it's about orchestrating electrons ...

The regulation promotes the use of energy storage in the EU's energy system, including the requirement for Member States to ensure that energy storage facilities have access to the grid on non-discriminatory terms.

## European air transport new energy storage line

It offers near real-time data on the deployment of storage facilities across Europe, including an interactive dashboard and map, and identifies all the technologies, from battery storage to pumped hydro, ...
