What is the telecommunications industry like in the DRC?

The telecommunications industry has not yet reached all potential consumers and has room to grow. Mobile telephones have a 44 percent penetration rate; internet penetration is approximately 3 percent of the total population. The DRC has not yet reached 5G and is still developing its 3G/4G network.

Why is DRC launching a mobile broadband project?

This venture is designed to improve mobile coverage and boost internet access where only 32.3% of the population currently enjoys mobile internet. The project aligns with the DRC's National Digital Plan Horizon 2025, which emphasizes digital accessibility and economic growth.

What is mobile internet penetration in the DRC?

Mobile Internet penetration in the DRC is at 32.3% and Orange and Vodacom's announcement to construct new base stations in the country aligns with the country's new vision for the digital economy as included in the National Digital Plan Horizon 2025 adopted in 2019.

What is the DRC Telecom fund?

Juste Ibombo, Minister of Telecommunications and the Digital Economy, said the fund would enable it to provide communications infrastructure and services in both rural and landlocked areas of the DRC. "The operators have been informed that they will be contributing 2% of their turnover to the new fund," said Ibombo.
