France's growing renewable capacity, supported by strong policy alignment, offshore wind expansion and grid modernisation, marks a key step in strengthening its energy resilience and ...

France is a leading player in the renewable energy sector in Europe, providing 22% of its energy consumption in 2023. A pioneer in the continent's carbon-neutral strategy by 2050, it is ...

That year, the country was one of the top five producers of renewable energy in Europe. Hydropower, wind, and solar are the primary sources of renewable energy in France.

9dTotalEnergies signs 10-year clean power deal with paper maker SWM in FranceTotalEnergies has secured a decade-long agreement to supply clean, firm renewable electricity to SWM's French paper plants, reinforcing its push into industrial decarbonization.Riviera Maritime Media· 13h"Imminent" PPE "must restore confidence in French renewables"Riviera Maritime Media· 1dFrench renewable energy industry hails constructive talks with Prime Minister· 9dFrance: TotalEnergies to Supply 800 GWh of Renewable Electricity to Paper Manufacturer SWM Over 10 Years· 1dEurope: TotalEnergies to Supply Renewable Electricity to Airbus in Germany and the United KingdomSee allFeedbackThanks!Tell us moreSee more newsopenenergytracker Renewable electricity - Open Energy TrackerHydroelectric power is currently the primary source of renewable electricity, accounting for over 42% of France's renewable electricity in 2023. Approximately 33% of the renewable production is provided ...

Find here the data on electricity generation in France, presented either in aggregate or in detail by generation type: nuclear, conventional thermal, hydro, solar, wind and renewable thermal.

In France, hydroelectricity is the second largest source of electricity generation, behind nuclear power, and is the primary source of renewable electricity. Flexible and storable, it contributes actively to the ...

Hydroelectric power is currently the primary source of renewable electricity, accounting for over 42% of France's renewable electricity in 2023. Approximately 33% of the renewable production is provided ...

France renewable electricity

France has an overall target of producing 23% of its total energy needs from renewable energy by 2020, encompassing 33% in the heating and cooling sector, 27% in the electricity sector and 10.5% in the ...

France managed to reach its target of generating 23 percent of its gross final energy consumption from renewable sources four years behind schedule. In 2024, 94 percent of France's electricity was ...

France is accelerating its clean energy transition, supported by expanding wind and solar deployment, modernisation of hydropower, and strong government policy backing.

France has made remarkable strides in securing its electricity needs from sustainable, low-carbon sources, with nearly 97% of its electricity coming from these sources in 2025.
