Looking forward, we can expect a continued interest in the decommissioning of solar and other clean energy facilities, including battery storage, and the recycling of these materials once they ...

A panel held at RE+ Northeast 2025 last week entitled "Solar End of Life or Just a Mid-Life Crisis: Repowering, Recycling and Public Policy" discussed the challenges the solar industry ...

To get ahead of this looming waste crisis, the Environmental Protection Agency announced in 2023 that it would craft a new rule to reclassify retired solar panels as "universal ...

Learn the full scope of solar decommissioning. Key topics include panel recycling, dismantling best practices, and calculating cost estimates for PV facilities.

Solar farm decommissioning marks the final chapter in a renewable energy site's lifecycle. This important process involves dismantling and removing solar energy systems once they reach the ...

Trump signed into law the One Big Beautiful Bill Act, a massive tax and spending package that ended subsidies for wind and solar energy projects years earlier than planned.

More than 20 states sued the EPA on Thursday, challenging its cancelation of a \$7 billion program that aimed to make solar power accessible to low-income households.

When solar panels, which typically have a 25-30 year lifespan, reach the end of their lives and become waste, they must be managed safely. Learn about this renewable energy waste, ...

While end of life occurs after solar panels and system components are no longer in use, considerations across the entire lifecycle of PV can help reduce the environmental impact of PV.

Government dismantles photovoltaic panels

When solar projects reach the end of their expected performance period, there are several management options. They include extending the performance period through reuse, refurbishment, or repowering ...
