---

Dutch solar innovator Wattlab and German inland shipping giant HGK Shipping have teamed up to launch the world's first hybrid solar-powered inland vessel as part of an ambitious ...

With 192 solar panels installed, the Blue Marlin can generate up to 37,500 kilowatt-hours (kWh) of electricity each year. For the first time in inland shipping, this solar energy is not only used ...

According to the study's results, integrated solar PV systems could reduce crew workload, enhance safety, increase ship energy range, and influence the design of new types of ...

These particular solar panels were specifically designed to be installed as easily and quickly as possible, using just container twist-lock fittings. They're just as easy to remove.

The Blue Marlin features an array of 192 solar panels capable of generating up to 37,500 kilowatt-hours annually. This solar setup works in tandem with four diesel generators, enabling a ...

As the global shipping industry faces mounting pressure to cut emissions and embrace clean technologies, this revolutionary vessel blends solar energy, advanced battery storage, and ...

Explore solar-powered shipping containers, sustainable and portable energy solutions for eco-friendly logistics.

Amid growing global pressure to reduce maritime carbon emissions, this "sun-powered" bulk carrier undoubtedly injects a beam of clean and steadfast sunlight into traditional shipping.

Imagine a revolutionary vision of the maritime industry: autonomous, solar-powered container ships that blend cutting-edge engineering with environmental stewardship. These ...

# High-efficiency solar-powered containers for ships

Voltic is building electric cargo ships that are zero-emission and 3x more profitable than existing ships. They designed a solar and battery tech stack that can completely power a container ship at standard ...
