California, however, leads the way in total solar (both utility- and small-scale) generation, producing over 68,800 GWh of electricity from the sun last year -- that's more than double the ...

This report summarizes the latest statistics on solar power capacity by state and highlights the top U.S. states in solar power generation.

California leads as the top solar state. With over 54 GW of solar installed, enough energy to power over 15 million homes. Texas has the fastest growing solar economy with the largest utility-scale solar and ...

List of electricity data aggregated by U.S. state. View number of power plants, total monthly generation, monthly generation by source, and monthly electricity sales revenue.

In 2024, the USA reached an all-time high in solar power capacity, adding 50 GW and generating 303 TWh of electricity. This article breaks down the explosive growth of solar energy in ...

California once again takes first place among the top states generating electricity from solar power this month. The Golden State produced 21.4% of the United States' total of 24,519 thousand ...

In 2024, over 30,000 MW of solar capacity came online, which is a 30% increase in operating solar capacity. An additional 34,000 MW are under preparation, testing, or construction and projected to ...

Much of the utility-scale solar generation capacity additions will come online in Texas. We expect that solar electricity generation supplied to the grid managed by the Electric Reliability Council ...

For the rolling 12 months ending March 2025, solar facilities, including utility-scale and small-scale projects, generated 321,830 GWh, up from 250,539 GWh in the rolling 12 months ...

How much solar power does the State Grid generate

Southeast states (Alabama, Florida, Georgia, North Carolina, South Carolina, Tennessee, Virginia) got nearly 27 times as much electricity from solar in 2024 as in 2015, producing enough ...
