How much does a solar project cost in Serbia?

Second, on 14 June 2023, the MoE published the first-ever public call for auctions to award the right to market premiums for 400 MW of wind and 50 MW of solar projects in Serbia. Bids are to be submitted by 14 August 2023. The maximum offered price is EUR 105/MWh for wind projects and EUR 90/MWh for solar projects.

How much solar power will Serbia produce in a year?

Only through strategic partnership and auctions (if successfully implemented) is Serbia expected to reach a capacity of more than 2.3 GW of new solar and wind power production facilities in the years ahead. Additionally, there are many projects developing on a commercial basis that do not count on incentives.

Who will build a self-balancing solar power plant in Serbia?

First, on 4 May 2023, the Government of Serbia initiated the procedure for selecting a strategic partner for the construction of 1 GW of self-balancing solar power plants to be owned and operated by the state-owned power utility EPS a.d. Beograd. The public call is expected to be published in the early summer of this year.
