Welcome to SUNGOLDPOWER's installation video for our new battery cabinets! This video provides a complete overview of the accessory components and a detailed step-by-step installation process.

Battery cabinets that are not supplied with an incorporated DC output disconnect device must have an appropriate disconnect device provided external to the cabinet.

Installation or replacement of batteries must be located in a SERVICE ACCESS AREA: The service manual shall include the following instructions for battery replacement and disposal:

Connect the power system's battery cable terminated in an Anderson connector to the first battery cabinet's battery cable terminated in a mating Anderson connector.

Make sure new battery is installed properly regarding polarity orientation. Use the supplied wiring drawing found inside the battery cabinet door to verify the cabinet wiring.

Important Safety Instructions -- SAVE THESE INSTRUCTIONS. Read these instructions carefully and look at the equipment to become familiar with it before trying to install, operate, service or maintain it.

The BC16 battery cabinet is equipped with four casters, two swivel types in front and two rigid types in the back. Move the cabinet into the desired location and lock the front casters.

One of the most common mistakes is to parallel all the batteries together and then connect one side of the parallel battery bank to the electrical installation.
