How do I connect a generator to my home?

Connect the power cord: Attach the power cord from the inlet box to the generator. Start the generator: Follow the manufacturer's instructions. Activate power: Use the transfer switch to direct power to selected circuits in your home. If you're using a mechanical interlock instead, be careful to monitor the load closely.

How do I set up a generator?

Here's what to do: Set up the generator: Move it to its designated outdoor spot. Connect the power cord: Attach the power cord from the inlet box to the generator. Start the generator: Follow the manufacturer's instructions. Activate power: Use the transfer switch to direct power to selected circuits in your home.

How do you Power a generator during a power outage?

During an outage, connect your generator to the power inlet box using a generator power cord. Flip the main breaker to the "Off" position and the generator breaker to the "On" position. Power up your generator and select which circuits you want to power. Powers your entire electrical panel, including hard-wired systems.

The new breaker connects to an inlet box that you connect your generator to with a 30- or 50-amp twist-lock generator cord. The breaker interlock prevents the generator breaker from ...
