The event brought together 50 young specialists studying abroad in the fuel and energy sector, conducting research in renewable energy, and working in international companies.

This project is a key collaboration between ACWA Power and the Uzbekistan Ministry of Energy, which includes a 200MW photovoltaic and 500MWh energy storage system.

Huawei Digital Power has announced the signing of a key contract with SEPCOIII for its NEOM Red Sea project, which involves 400 MW of PV plus a 1300 MWh battery energy storage solution (BESS), ...

As solar and wind projects multiply across Tashkent, Huawei's energy storage batteries have emerged as the missing puzzle piece - think of them as a 'power insurance vault' for unstable weather days.

The government has inaugurated the country's first utility-scale integrated solar and battery project and advanced plans for its largest standalone energy storage facility

Whether you're looking for large-scale utility solar projects, commercial containerized systems, or mobile solar power solutions, we have a solution for every need. Explore and discover what we have to offer!

The PPA extends for 25 years for solar and wind energy and 15 years for storage, ensuring long-term financial viability for the project. The project is expected to meet Uzbekistan's ...

Once operational, this project will not only advance Uzbekistan's green energy goals under the "One Belt, One Road" initiative but also boost the local economy by creating over 300 jobs.

The construction of the first phase of Artemisya - comprising 100 megawatts / 200 megawatt-hours of storage and the first 100-megawatt wind tranche - was launched following the ...

Huawei Uzbekistan Wind Solar and Energy Storage Project

The 100MW/200MWh energy storage system, positioned at the core of the project, will focus on functions including peak shaving and valley filling, smoothing wind and solar output ...
