Landsvirkjun is the National Power Company of Iceland. We produce electricity from renewable energy sources; hydropower, geothermal energy, and wind. We are the nation's biggest energy company. We generate ...

There is a nascent wind energy sector and some interest in developing solar power, especially for off-grid uses. As Landsvirkjun and Reykjavík Energy are publicly owned, tendering is mandatory if the value ...

Overview Connection to the rest of Europe Production and Consumption Transmission Distribution Competition There are plans to connect the Icelandic grid with the UK using a subsea High-Voltage DC (HVDC) interconnector, with a potential capacity of up to 1.2GW, called Icelink. It would be the world's longest submarine HVDC cable, if built. This would allow Iceland to export excess energy to UK and in turn linking it to a wider European super grid. The project is in planning stages and is controversial in Iceland due to fears of increased domestic electricity prices a...
