Bayannur, China, April 2, 2025 - Sineng Electric is spearheading the integration of renewable energy and ecological restoration by supplying 854.72MW of high-efficiency string inverters to a landmark ...

The project is just a small part of the ambitious plan of the Inner Mongolia government to integrate sand control with renewable energy to tame the ever-expanding desertified area, said Sun ...

Once defined by arid wastelands and ecological degradation, the Kubuqi and Ulan Buh deserts in Inner Mongolia are now home to vast expanses of solar panels -- a transformation that's ...

In recent years, Inner Mongolia has carried out integrated projects for sand prevention and control as well as wind and photovoltaic power to advance the improvement efforts in Kubuqi Desert.

Compared with the vast land under the jurisdiction of Otog, the Mengxi Otog Front Banner Photovoltaic Base project, which covers about 7,000 hectares, is much like a tiny grain of ...

According to GD Power Development Co, the number of solar panels to be installed in the project totals roughly 6.4 million. Meanwhile, 2.35 million steel piles have to be driven into the ground as ...

With a total installed capacity of 300 MW, the CGN project achieved a full-capacity grid connection on May 30 this year. It innovatively adopts a "grass-PV complementary" ecological ...

Workers from CHN Energy Inner Mongolia Company dedicated their time and effort to transform the desolate landscape into a remarkable "blue ocean" of photovoltaic panels. After more ...

Seeds of desert plants are pictured at an integrated sand control and photovoltaic project at a state forestry area in the edge of Ulan Buh Desert in Linhe District of Bayannur, north China's Inner ...
