-----

It includes three sleek and quiet indoor units: two KSIE012-H220-IW-2 (12,000 BTU each) and one KSIE024-H220-IW-2 (24,000 BTU), providing individualized comfort with heating, ...

Inverter technology combined with air conditioner heat pump can generate energy savings up to 49% compared to standard on/off systems. Its finely tuned climate control offers the added benefits of ...

This unit is integrated with DC Inverter technology enables variable compressor speed, reducing the power usage to the minimum while keeping the indoor temperature steady and constantly controls ...

The KSie018-H220 by Klimaire is an exceptional 18,000 BTU 21 SEER Ductless Mini Split Inverter Heat Pump, designed for both heating and cooling purposes. This unit operates on a voltage range of 208 ...

Engineered with DC inverter variable speed technology, the system maintains steady temperatures without constant thermostat adjustments while achieving up to 23.1 SEER2 efficiency ...

Klimaire KSIM Bio-Tech Series, single zone inverter series, air conditioners and heat pumps are the ultimate cooling and heating technology of the HVAC. These advanced units use the inverter ...

Inverter technology combined with air conditioner heat pump can generate energy savings up to 49% compared to standard on/off systems. Finely tuned climate control offers the added benefits of less ...

The inverter-driven compressor also stabilizes room temperature and saves energy. By means of a microprocessor, inverter mechanics sense the indoor air temperature and adjust compressor speed ...
