It is planned in Guangxi Zhuang Autonomous Region, China. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently at the partially active stage. It ...

The phase II project of Zhangpu wind farm, China's first offshore wind farm with the largest single-capacity with turbines, was connected to the grid for power generation on Thursday.

The offshore wind power facility was put into operation in Fujian province on Friday. With a new energy digital platform, the project is the first to achieve integrated monitoring of...

China's largest offshore wind farm in terms of single-unit capacity off the eastern province of Jiangsu was connected to the power grid at full capacity on Saturday.

Guangxi Quanzhou Jinfengling wind farm is a wind farm under construction in Yongsui Township, Quanzhou, Guilin, Guangxi, China.

Guangxi Guilin Quanzhou Jinfengling Wind Farm is an Onshore Wind project located in Guangxi Zhuang Autonomous Region, China. The project is owned and developed by Zhongneng Huaguang ...

With a total installed capacity of 400 megawatts, the wind farm project will be able to generate 1.6 billion kWh of electricity annually, meeting the annual electricity consumption needs of ...

BEIJING -- China's farthest offshore wind power project has achieved its first grid connection, marking a significant step forward in the country's deep-sea renewable energy ...

The world's first 20-megawatt (MW) wind turbine, which is capable of powering more than 44,000 times a year, has finally been connected to the Chinese's grid.

Jinfengling Wind Farm is connected to the grid for power generation

Offshore wind power, with accelerated declining levelized costs, is emerging as a critical building-block to fully decarbonize the world's largest CO2 emitter, China.
