In the heart of Inner Mongolia's Kubuqi Desert, a groundbreaking project is transforming the landscape and revolutionizing energy production. The massive 400-kilometer solar park aims to ...

From the onset, SPIC Nei Mongol Energy adopted a hybrid model to generate electricity using PV while shading the sandy areas with PV panels to control the sand and rehabilitate the local flora.

When NASA satellites captured images of China's Kubuqi Desert transitioning from yellow to blue in 2024, the world took notice. This photovoltaic solar power generation miracle in northern China's ...

One key method used in this undertaking has been the introduction of alternative energy projects in the desert's more barren areas. One such effort is the Kubuqi 2000-megawatt Photovoltaic ...

The Kubuqi desert, the seventh largest desert in China, is home to the Kubuqi photovoltaic desertification control project, which stands strong as a beacon of green construction. ...

The city of Ordos, also known for its abundant coal resources, has several large coal mines around the Kubuqi Desert. The treated drainage water from the coal mines is channeled to the ...

Recently, the project achieved its first grid-connected power generation, symbolizing Hanggin Banner's ambitious efforts to expand the "Photovoltaic Great Wall" concept across the ...

The 2000 MW photovoltaic desertification control project in the Kubuqi Desert is located in Dugui Gala Industrial Park in Hangjinqi. Construction of the project started in 2022, was completed in ...

The Kubuqi project exemplifies China's broader effort to integrate renewable energy with ecological restoration. In the arid expanses of northern China, advanced technology is reshaping the ...

Kubqi Desert Photovoltaic Panel Transportation

An aerial drone photo taken on Sept. 2, 2025 shows workers installing photovoltaic panels at a new energy base in Kubuqi Desert, north China's Inner Mongolia Autonomous Region.
