With a goal of sourcing 50 percent of its electricity from renewable sources by 2030, the Kingdom is investing heavily in solar energy, capitalizing on its abundant sunlight.

In November 2022, ACWA Power and the Water and Electricity Holding Company (Badeel) entered into an agreement to construct the world's largest single-site solar power plant in Al Shuaibah, Mecca ...

In 2025, several key renewable energy projects in Saudi Arabia are set to shape not only the Kingdom's energy landscape but also the global conversation around sustainable development. ...

According to market research firm Mordor Intelligence, the Kingdom's solar market is projected to achieve a compound annual growth rate of 51 percent between 2024 and 2029 as a host ...

Saudi Arabia's landmark projects under development include the world's largest green hydrogen plant at Neom, one of the world's largest battery energy storage projects, and several of ...

Leveraging its abundant sunshine and vast desert areas, Saudi Arabia is now pivoting to solar energy, aligning with its Vision 2030 plan to diversify its economy and ensure sustainable ...

ACWA Power, Badeel, and SAPCO will jointly own the projects, which are expected to start operations between late 2027 and early 2028. Financial closure is targeted for the third quarter ...

OverviewSolar projectsHistoryTypes of solar powerGovernment policyPublic responseFutureo The Sakaka solar plant is located in Sakaka City, Saudi Arabia. Construction on the project began in November 2018 and the project finished in November 2019. The plant produces roughly 900 GWh of electricity per year, which mitigated the release of 600,000 tons of carbon dioxide. Additionally, Sakaka powers over 75,000 homes. o Conergy is a Germany-based solar energy company that wanted to branch out into the Saudi Arabian market. Conergy believes that Saudi Arabia and other countries in the Midd...

Large-scale solar power generation system in Saudi Arabia

In June 2021, the Sakaka and the Sudair solar projects commenced their operations, boasting a substantial capacity of 1.5 GW. Furthermore, Saudi Arabia is currently engaged in wind power ...

It rigorously examines the cost-effectiveness of distributed solar power in Saudi Arabia, supported by a detailed power generation and economic analysis of grid-tied PV systems.

Saudi researchers outlined pathways for Saudi Arabia to reach net-zero power sector emissions by 2060, requiring up to 3.6% of land - mostly for onshore wind - with 151.3 GW of solar ...
