Dual-use applications such as agrivoltaics, floating PV, and infrastructure-integrated PV are becoming increasingly relevant, helping balance land use, food production, and renewable energy generation.

For solar PV, wind and bioenergy for power, deployment has been revised downwards. Solar PV accounts for over 70% of the absolute reduction, mainly from utility-scale projects, while offshore wind demonstrates the ...

U.S. residential solar companies are preparing for a steep drop in business this year after the expiration of a federal tax credit that helped drive more than a decade of rapid growth, prompting...

These case studies offer valuable insights for local governments and other stakeholders who are interested in pursuing large-scale solar projects in their communities.

In our STEO forecast, utility-scale solar is the fastest-growing source of electricity generation in the United States, increasing from 290 BkWh in 2025 to 424 BkWh by 2027. Almost 70 gigawatts (GW) of ...

o At the end of 2024, solar was the second-largest source of U.S. generation capacity, though still a growing percentage of the U.S. electric generation mix. o In 2024, solar represented 13.7% of net ...

We are here to bring you the latest solar news, progress and innovations, and everything else that you need to and want to know about the solar industry.

Solar accounted for 58% of all new electricity-generating capacity added to the US grid through the third quarter of 2025, with more than 30 GW installed. Solar and storage, combined, accounted for 85% ...
