To access additional data, including an interactive map of global solar farms, a downloadable dataset, and summary data, please visit the Global Solar Power Tracker on the Global Energy Monitor website.

Actively promote the construction of photovoltaic projects with installed capacity of 5.58 million kilowatts in Butuo, Zhaojue, Meigu, Leibo, and Jinyang; the central and northern bases.

The photovoltaic field covers a vast area of about 3,000 acres, spanning four towns and villages, namely Ma'anshan Township, Baru Town, Youjun Town, and Kaiyuan Township. It not only ...

On January 12th, 2025, the Sichuan Huadian Liangshan Xichang Donghe 100MW Photovoltaic Project, constructed by PowerChina Kunming, was officially put into operation and began generating electricity.

Optimizing solar photovoltaic plant siting in Liangshan Prefecture, China: A policy-integrated, multi-criteria spatial planning framework

This paper proposes a model called X-LSTM-EO, which integrates explainable artificial intelligence (XAI), long short-term memory (LSTM), and equilibrium optimizer (EO) to reliably forecast solar ...

In this study, we developed an integrated technical, economic, and grid-compatible solar resource assessment model to analyze the spatial distribution and temporal evolution of the cost ...

This study introduces a novel framework for identifying optimal sites for PV plants within China's spatial planning. Through two screening stages and three decision-making processes validated in ...

How to choose the right site for solar PV power plants? Choosing the right site is key for solar pv power plants. It involves checking different geospatial and environmental factors to find the best spots for ...
