-----

While the pace of price decreases has slowed, lithium-ion battery packs have reached a new record low in 2025. According to the latest analysis by BloombergNEF (BNEF), prices have ...

Battery pack prices for stationary storage applications reached \$70/kWh in 2025, representing a dramatic 45% year-over-year reduction. This segment experienced the steepest ...

But 2025 has seemingly broken that rule. According to the latest analysis released this week by BloombergNEF (BNEF), the volume-weighted average price for lithium-ion battery packs ...

Lithium-ion battery prices dropped again in 2025, with average prices coming down 8% to \$108 per kilowatt-hour, according to BloombergNEF's annual price survey. China's lead in low ...

BloombergNEF's 2025 survey finds average lithium-ion pack prices dropped 8% to \$108/kWh, driven by LFP adoption, overcapacity, and competition. Stationary storage costs plunged ...

According to BloombergNEF's annual survey, battery prices in 2025 remained at \$108 per kilowatt-hour, an eight percent decrease. Experts also anticipate further price declines next year, ...

Understand why EV battery prices have been decreasing over the last few years. Get S& P Global Mobility's forecasts for EV battery cell prices through 2030.

In 2025, global lithium-ion battery pack prices fell to a record \$108/kWh, defying the rise in lithium and cobalt costs. This trend reflects a maturing supply chain, increased adoption of LFP ...

In 2025, the average lithium battery price per kilowatt-hour (kWh) continues to fall. Most industry forecasts place the global average between \$85 and \$100 per kWh, with some sources ...
