Support the creation of green energy storage bases in the Yangtze River Delta, promote the construction of new energy storage on the power supply side, grid side, and user side, and ...

in the Yangtze River Delta based on local characteristics. The primary features, key issues, and overall integration of the system are discussed. At the same time, the economic, environmental,...

This paper uses the two-stage NDEA-SBM model to calculate the energy, ecology, and economic (3E) efficiency of the Yangtze River Economic Belt (YREB) and analyze the spatial ...

A subsidiary of China National Offshore Oil Corporation (CNOOC) has completed the construction of China's largest LNG storage base, a move that aims to ensure energy security and support green ...

By deploying energy storage solutions effectively, Yangtze River Energy Storage not only enhances energy reliability but also contributes significantly to environmental conservation efforts.

Beyond the basin, there is the Yangtze River Economic Belt (YREB) comprising the 9 provinces and 2 municipalities along the river; close to 600mn people live in the YREB.

This study addresses key questions regarding current trends in energy transition and carbon emissions in the Yangtze River Economic Belt, focusing on how industrial upgrading drives ...

Here, we focused on the Yangtze River Delta (YRD) urban agglomeration in China and proposed an optimization framework for energy, environment, and economy.

For this purpose, this paper uses the super-efficiency SBM model, ML index and Tobit model considering undesired output to explore the energy efficiency and the main factors affecting it of nine ...
