In December 2023, the country signed contracts for its first utility-scale battery energy storage system (BESS) - a 54MW/54MWh project at Omburu Substation [1] [2]. But why should the world care about ...

One of the most important inputs for economic growth is an abundance of reliable, affordable energy and Namibia is increasingly coming under pressure to deliver a power supply that ...

The project features a 45 MW / 90 MWh BESS facility, representing the country's largest battery, and is part of the broader Transmission Expansion and Energy Storage (TEES) program.

The Republic of Namibia (the Borrower), through the Namibia Power Corporation (Proprietary) Limited (the "Borrower") will implement the Namibia Transmission Expansion and Energy Storage Project ...

Once operational, the Omburu BESS will allow NamPower to manage energy supply and demand more effectively. The system will perform energy arbitrage, displace costly emergency ...

Namibia is not yet self-sufficient, but the combination of grid-scale storage and transmission expansion is laying the foundation for a more resilient and renewable-driven power ...

WINDHOEK, Dec. 13 (Xinhua) -- Namibia's power utility, NamPower, on Wednesday signed an agreement with two Chinese companies for the development of the country's first 54MW/54MWH ...

Emerging Power Crisis: The emerging power crisis in the SAPP region, driven by demand growth outpacing supply and exacerbated by increasingly severe climate impacts on hydropower resources, ...

Surplus electricity from RE generation as well as cheaper electricity imports from the Southern African Power Pool (SAPP) can be stored in the BESS. The stored energy could supply customers during ...

Namibia Power Emergency Energy Storage Plan

Namibia's power security has strengthened after Eskom agreed firm supply contracts effective from April 2025, supported by improved plant performance in South Africa.
