Lawrence Berkeley National Laboratory compiled and synthesized empirical data on the U.S. utility-scale solar sector.

The NASA POWER project's Data Access Viewer (DAV) is an interactive web-mapping application providing access to NASA solar and meteorological data.

Data and Tools NLR collects data sets and develop tools to aid in the analysis and adoption of solar energy. Also, see the list of all NLR's solar data and tools. Annual Technology Baseline Provides a ...

Browse or search this comprehensive listing of data and tools for analyzing photovoltaic (PV) and concentrating solar power (CSP) technologies, solar grid and systems integration, and ...

Electricity generation by the U.S. electric power sector totaled about 4,260 billion kilowatthours (BkWh) in 2025. In our latest Short-Term Energy Outlook (STEO), we expect U.S. ...

The National Renewable Energy Laboratory (NREL) is a U.S. Department of Energy national laboratory located in Golden, Colorado. As part of the PERFORM project, NREL has produced a set of time ...

Solar accounted for 58% of all new electricity-generating capacity added to the US grid through the third quarter of 2025, with more than 30 GW installed. Solar and storage, combined, ...

Energy production estimates generated by developers and independent engineering firms are a critical part of the package reviewed by investors.

Lawrence Berkeley National Laboratory compiled and synthesized empirical data on the U.S. utility-scale solar sector. Utility-scale solar is defined here to include ground-mounted systems ...
