---

As electric vehicle (EV) batteries degrade to 80 % of their full capacity, they become unsuitable for electric vehicle propulsion but remain viable for energy storage applications in solar ...

New Delhi: The Central Electricity Authority (CEA) has outlined a strategy to boost the use of electric vehicles (EVs) in energy grid support, which could significantly enhance the sustainability ...

A robust, circular battery ecosystem is central to this transformation, enabling advancements in renewable energy storage, electric vehicles (EVs), and clean urban transport.

In a significant step toward India's clean energy transition, AmpereHour Energy, in collaboration with Indigrid and BSES Rajdhani Power Limited (BRPL), has successfully ...

India's renewable energy sector, backed by government initiatives and a robust policy framework, is set to drive the country's transition to clean energy, with a special focus on integrating ...

India Energy Storage Alliance (IESA) is a leading industry alliance focused on the development of advanced energy storage, green hydrogen, and e-mobility techno

This article explores the impact of energy storage on the EV sector, its key benefits, challenges, and how energy storage technologies can accelerate the transition to electric mobility.

As the sun sets over Yamuna River, one thing's clear - New Delhi's energy storage batteries aren't just backup plans. They're rewriting the rules of urban power.

As of August 2025, government data shows that Delhi has 1,967 EV charging stations, with plans for further expansion as part of the new policy. A Delhi-based EV industry expert said the...

# New delhi energy storage for electric vehicles

This Solar-Powered EV Charging Carport, established as a pilot project at the Hauz Khas Village parking station, marks a significant milestone in sustainable energy and electric vehicle ...
